KLM "AMALIA"

Once an old Cargo boat made of the strongest iron wood available on earth - 'Kayu Ulin' - redesigned by us into an uber safe scuba ship.

Her name "Amalia" originates from the latinised Germanic name 'Amal' which means "Hard work". The Italian verb "amaliare" is also relevant and means "attraction".

The fusion of the two meanings is the perfect description of our project.

KOMODO NATIONAL PARK LAND EXPLORATION

6 NIGHTS

4 nights aboard cruising AND diving in Komodo National Park. 2 nights (arrival and desaturation day) in Labuan Bajo in Seaesta accommodation.

15 DIVES

The plan is to have 5 days of diving, with 3/4 dives per day. Pristine locations with drift, wall, muck diving, each with unique encounters with marine life.

EXPLORING

During our days aboard we will also touch land to explore the beauty of Komodo National Park with Padar Island and of course the Komodo Dragons.

LABUAN BAJO & KOMODO PARK

Labuan Bajo, located on the westernmost tip of the Indonesian island of Flores, is a popular destination for diving enthusiasts. It serves as the gateway to the Komodo National Park, a UNESCO World Heritage site and one of the most biodiverse marine regions in the world.

Underwater world of this region is filled with vibrant coral reefs, an abundance of marine life, and awe-inspiring dive sites. The warm tropical waters surrounding Labuan Bajo are home to an incredible variety of marine species, including manta rays, sea turtles, reef sharks, colorful coral fish, and even the renowned Komodo dragons.

Our program includes exploring by land the National Parks of Komodo Dragons and Padar.

KOMODO & CURRENTS

Many dives in Komodo do have some type of current, the majority we do as a normal drift dive where we drop in at the beginning, maintain our buoyancy and float with the current and then put up a surface marker buoy so that we can signal to the boat to get picked up at the end of the dive (current can often be the lazy divers best friend!).

Other sites, such as in the North the dives are current dives. MORE FOR ADVANCED DIVERS since the depth and the type of dive require more experience and skills . Sometimes we need to kick a little more than usual to get ourselves into the protected area away from the current allowing us to see all the best action :)

We would NEVER take you on a dive that would be of risk to you or any of our guides or instructors - be assured of that.

KOMODO MARINE LIFE

1200 **RESIDENT MANTAS RAYS** and different species of rays (Devil, Javanese, Marble, Thorny, Eagle and more)

MORE THAN 1,000 **SPECIES OF TROPICAL FISH.**

HEAVEN FOR MUCK DIVING (blue ring octopus, pygmy seahorses, coleman shrimps, nudibranch, frogfish, pipefish.)

PERFECT JUVENILES NURSERY

SCHOOLS OF: Reef sharks, tunas, trevallies, barracudas, turtles, bumphead parrotfish, napoleon wrasse, groupers, fusiliers and more...

(...if you are lucky guitar sharks, marlins, wobbegong)

MAMMALS: Regular sightings of dolphins & dugongs

Seasonally whales and whales sharks have been spotted. Keep your eyes peeled!
